

Granada LRV contract awarded

A JOINT-venture of CAF and Santana, Spain, has been awarded a €43.9 million contract to supply 13 low-floor LRVs for Granada.

The 30m-long bidirectional vehicles will have capacity for

up to 200 passengers, and will be delivered within 26 months. The contract includes maintenance and an option for four additional vehicles.

The 15.9km line includes four catenary-free sections

totalling 4.7km, and the LRVs will be equipped with CAF's ACR onboard energy storage system for operation away from the wires. The €450 million project will be completed in 2012.
